Sourcing QUICKLIME in Arizona

Sourcing quicklime in the Southwest US · https://highdesertpermaculture.org/docs/sourcing-quicklime-in-the-southwest-us/sourcing-quicklime-in-arizona/

I couple of months ago I started my search for quicklime and incredibly, my closest source was Albuquerque.

Nothing in Arizona, Nevada or Southern California.

I checked with Home Depot and the contractors' suppliers, but nobody would special order quicklime.

I was thrilled to find the Lhoist Nelson mine just an hour outside Kingman AZ on the Hualapai rez near Peach Springs and eventually I found the plant manager Jolene on Facebook. Incredibly, she responded to my message, and promised a call from sales. I was so excited! But I didn't receive a call. And when I sent her another FB message, I didn't get a response.

Today I'm restarting and documenting my efforts and I'll update here.

https://www.limeworks.us/customers/retailers/

Apparently the closest retailer is in Petaluma, Northern California.

Searched the online store for "quicklime" and got https://www.limeworks.us/product/carmeuse-high-calcium-lime/

> Carmeuse’s High Calcium Lime Product Description
>
> Carmeuse’s High Calcium Lime (Calcium Oxide) is produced from limestone containing over 98% calcium carbonate.
>
> Made from high-quality, natural deposits of limestone, and meeting exacting chemical and physical properties, Carmeuse’s quicklime products provide high-performance, cost-effective, and environmentally friendly attributes and benefits for a broad range of industrial applications.
